CLAIM REPLACEMENT VERSIONS

Please Substitute the Following Claims for the Pending Claims:

4 1. (Once Amended) A method for a server to provide content to a
5 client, the method comprising:

6 receiving a request from the client for one or more requested content items;

7 identifying a data structure that refers to one or more further content items;

8 modifying the data structure to reference the requested content items; and

9 providing the content items referenced by the modified data structure.

10
11 2. (Once Amended) A method as recited in claim 1:

12 wherein identifying the data structure, the data structure comprises a
13 playlist;

14 wherein receiving the request, the one or more requested content items
15 comprises streaming media content; and

16 wherein providing the content items further comprises streaming the
17 content items referred to by the playlist.

18
19 3. (Once Amended) A method as recited in claim 1, wherein
20 identifying the data structure, the data structure comprises a first Web page
21 specification, and the requested content comprises a second Web page
22 specification.
23
24
25

1 4. (Once Amended) A method as recited in claim 1, wherein modifying
2 the data structure further comprises adding a plurality of references to the
3 requested content item in the data structure.

4
5 5. (Once Amended) A method as recited in claim 1, wherein modifying
6 the data structure further comprises adding a plural number of references to the
7 requested content item in the data structure, the number being indicated by the
8 request.

9
10 6. (Once Amended) A method as recited in claim 1, wherein receiving
11 the request, further comprises receiving a variety of requests from the client, at
12 least one subset of the variety of requests comprising respective requests to one or
13 more different content items.

14
15 7. (Once Amended) A method as recited in claim 1, wherein modifying
16 the data structure, the data structure further comprises a placeholder that identifies
17 a particular point in a sequence where the reference to the requested content is
18 placed.

19
20 8. (Once Amended) A method as recited in claim 1, wherein
21 identifying the data structure further comprises creating the data structure by
22 modifying a base data structure.

1 9. (Once Amended) A method as recited in claim 1, wherein
2 identifying the data structure further comprises creating the data structure by
3 copying a base data structure.

4
5 10. (Unchanged) One or more computer-readable media containing
6 computer program instructions for providing streaming media content to a
7 plurality of clients, the computer program instructions comprising instructions for:
8 receiving a request that refers to one or more streaming media content
9 items;

10 identifying a playlist that refers to a sequence of one or more further
11 streaming media content items;

12 modifying the playlist to reference the one or more requested streaming
13 media content items in the sequence; and

14 streaming the streaming media content items referenced by the modified
15 playlist.

16
17 11. (Unchanged) One or more computer-readable media as recited in
18 claim 10, wherein modifying the playlist further comprises adding a plurality of
19 references to the requested content item to the playlist.

20
21 12. (Unchanged) One or more computer-readable media as recited in
22 claim 10, wherein modifying the playlist further comprises adding a plural number
23 of references to the requested content item to the playlist, the number being
24 indicated by the received request.
25

1 13. (Unchanged) One or more computer-readable media as recited in
2 claim 10, wherein identifying the playlist further comprises creating the playlist by
3 modifying a base playlist.

4
5 14. (Unchanged) One or more computer-readable media as recited in
6 claim 10, wherein identifying the playlist further comprises creating the playlist by
7 modifying a copy of a base playlist.

8
9 15. (Unchanged) One or more computer-readable media as recited in
10 claim 10, wherein modifying the playlist, the data structure further comprises a
11 placeholder that identifies a particular point in the sequence where the requested
12 content is placed.

13
14 16. (Unchanged) One or more computer-readable media as recited in
15 claim 10, wherein receiving the request further comprises instructions for
16 receiving a variety of requests from the client, at least one subset of the variety of
17 requests comprising respective requests to one or more different streaming media
18 content items.

19
20 17. (Unchanged) One or more computer-readable media containing
21 computer program instructions for providing Web content to a plurality of clients,
22 the computer program instructions comprising instructions for:

23 receiving a request from the client for one or more requested Web
24 documents;
25

1 identifying a wrapper Web document that refers to one or more further Web
2 documents;

3 modifying the wrapper Web document to reference the one or more
4 requested Web documents; and

5 providing the Web documents referenced by the modified wrapper Web
6 document to the client.

7
8 18. (Unchanged) One or more computer-readable media as recited in
9 claim 17:

10 wherein modifying the wrapper Web document further comprises adding a
11 plurality of references to the requested Web documents in the wrapper Web
12 document.

13
14 19. (Unchanged) One or more computer-readable media as recited in
15 claim 17, wherein modifying the wrapper Web document further comprises:

16 adding a plural number of references to the requested Web documents in
17 the wrapper Web document, the number being indicated by the received request.

18
19 20. (Unchanged) One or more computer-readable media as recited in
20 claim 17, wherein identifying the wrapper Web document, the wrapper Web
21 document is a base wrapper Web document.

22
23 21. (Unchanged) One or more computer-readable media as recited in
24 claim 17, wherein identifying the wrapper Web document, the wrapper Web
25 document is a copy of a base wrapper Web document.

1
2 22. (Unchanged) One or more computer-readable media as recited in
3 claim 17, wherein modifying the wrapper Web document, the wrapper Web
4 document further comprises a placeholder that identifies a particular point in a
5 sequence where the requested documents are referenced.

6
7 23. (Unchanged) One or more computer-readable media as recited in
8 claim 17, wherein receiving the request further comprises instructions for
9 receiving a variety of requests from the client, at least a subset of the variety
10 comprising respective requests to one or more different Web specification
11 documents.

12
13 24. (Unchanged) A server including a processor configured to perform
14 one or more operations comprising:

15 receiving a plurality of requests from a client for one or more requested
16 content items;

17 for at least a subset of the received requests:

18 (a) identifying a data structure containing a sequence of references to one or
19 more further content items;

20 (b) modifying the data structure reference to the requested content items;
21 and

22 (c) communicating the content items referenced by the modified data
23 structure to the client.

1 25. (Unchanged) A server as recited in claim 24, wherein the data
2 structure comprises a playlist, the requested content comprising streaming media
3 content, and wherein the communicating comprises streaming the content items
4 referenced by the modified data structure to the client.

5
6 26. (Unchanged) A server as recited in claim 24, wherein the data
7 structure comprises a first Web page specification, and wherein the requested
8 content comprises a second Web page specification.

9
10 27. (Unchanged) A server as recited in claim 24, wherein modifying the
11 data structure comprises including a plurality of references to the requested
12 content item in the data structure.

13
14 28. (Unchanged) A server as recited in claim 24, wherein modifying the
15 data structure comprises including a plural number of references to the requested
16 content item in the data structure, the number being indicated by the request.

17
18 29. (Unchanged) A server as recited in claim 24, wherein identifying the
19 data structure comprises creating the data structure by modifying a base data
20 structure.

21
22 30. (Unchanged) A server as recited in claim 24, wherein identifying the
23 data structure comprises identifying the data structure by modifying a copy of a
24 base data structure.

1 31. (Unchanged) A server as recited in claim 24, wherein at least a
2 subset of the received requests refer to differing content items.

3
4 32. (Unchanged) A computer-readable medium having stored thereon a
5 wrapper data structure comprising:

6 one or more first data fields, each data field containing data therein
7 representing a respective reference to a set of content items; and

8 at least one second data field containing data therein representing a
9 respective placeholder to identify a particular point in a sequence of the one or
10 more first data fields where a reference to a set of client requested content is to be
11 inserted.

12
13 33. (Unchanged) A computer-readable medium as recited in claim 32:
14 wherein the data structure comprises a playlist; and
15 wherein the content items and the client requested content are streaming
16 media content items that are respectively identified with a Universal Resource
17 Locator.

18
19 34. (Unchanged) A computer-readable medium as recited in claim 32:
20 wherein the data structure comprises a Web page;
21 wherein the content items are a first set of Web page specifications; and
22 wherein the client requested content are one or more second Web page
23 specifications.
